ARE CALIFORNIA'S ELECTED LEADERS REPRESENTING YOU?

Republicans would govern differently.

We believe:

- Government should work for the people...not the other way around.
- Taxpayers do not have unlimited funds to give to the government. Spending priorities should include effective programs for those who cannot help themselves, good roads, safe communities, and a quality education for every child that prepares them for today's dynamic economy.
- It is unacceptable that under Democrat rule, our state has the highest rate of poverty, unaffordable housing, and few healthcare options. Their programs don't work. Republicans want to empower community organizations that provide residents with effective resources to escape poverty and homelessness. We want to invest in preventative medicine and affordable care.
- If we conserve and store water efficiently, there will be plenty for nature, people and agriculture.
- Legal immigrants bring value to our state, and sanctuary cities make neighborhoods less safe.

If you believe taxes are too high, government priorities are going in the wrong direction, and change is needed, then consider registering and voting Republican. We believe in solutions, not excuses.
